

WINDOWS		Notes
	<p>Window screens</p> <p>Check all window screens. Screens should fit snugly and have tabs for removal. Are there screens on all windows? Are any screens torn or damaged?</p>	
	<p>Window trim</p> <p>Inspect the window trim around every window. The trim should be clean and neatly attached. Are there any signs of water damage?</p>	
	<p>Window seal</p> <p>Inspect the caulk and material sealing the windows on the coach. Depending on the style of windows, this can be a difficult task. Carefully check for signs of water infiltration and damage. Are there any stains near the windows?</p>	
	<p>Window emergency exit latch and operation</p> <p>Safety in an RV is critical. Locate the emergency exit which is often a window exit. Learn how to operate this emergency exit. Demonstrate its proper use to all occupants.</p>	
	<p>Drapes</p> <p>Are the coach drapes clean and in good condition? Do the drape mounting rails or tabs all function properly? For sliding drapes, slide them open and closed. Do they move freely? Are all the tabs in place? Do any of the drapes have signs of water damage? If so, carefully examine why?</p>	
	<p>Window coverings, day night shades</p> <p>Many RV windows have dual stage blinds, also known as day-night shades. Check the operation of each of these shades. Are they in good condition? Do all shades function properly? Do any of the shades have signs of water damage? If so, examine why.</p>	

	<p>Front window drop down shade</p> <p>Front coach shades, mechanical or electrical, are fairly common in motorhomes for privacy. If equipped, do the shades function properly? Any signs of damage? Any signs of water infiltration? Do the shades extend and retract smoothly?</p>
